

QUICK START

Set up HomeSorted in about 15 minutes

Start with one real household problem. You do not need to set up the whole home today.

First, complete three short setup steps. Then add one real thing and see what Today does with it.

1

Create your household

Open homesorted.today and choose Start free. Confirm your email, name the household and follow setup.

2

Choose a few cupboard staples

Tap at least three things you already have. Approximate is fine; this is a useful starting point, not an audit.

3

Pick one first win

Choose food, meals, money or shared responsibilities. Start where your household is carrying the most mental load.

4

Add one real thing

Photograph and review a grocery receipt, plan one meal, add one bill or assign one chore. Check before approving.

5

Open Today

Look for the few things worth attention. Tap Why on one suggestion to see the household information behind it.

6

Invite only if sharing helps

Invite one household member and give them the responsibilities they actually need. You can add more later.

7

Stop

Do not finish the pantry or tour every tool. Return tomorrow and notice whether HomeSorted remembered something for you.

Stuck? Email support@homesorted.today. We reply within one business day, Monday-Friday.
